Wallonia.be

Wallonia has an excellent logistics infrastructure and «multimodality» is the keyword. **Liege Airport** was awarded the title of **best cargo airport in the world** for the year 2020. You will also find yourself well supported : the actors of the sector are gathered in the «Logistics in Wallonia» cluster.

Wallonia.be

5 WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

AGENCE DU NUMERIQUE & DIGITAL WALLONIA

The Agence du Numérique is the public service body responsible for monitoring technological innovation and habits relating to digital technology, advising the Walloon Government and its departments on this area, and leading or coordinating operational or communication measures to support Wallonia's digital transformation by drawing on the Digital Wallonia strategy approved in December 2015.

What is Digital Wallonia?

A strategy. Adopted by the Walloon Government, it sets the priorities and goals for public policies and the support framework for private initiatives to promote the digital transformation.

A platform. Governed collaboratively by the Walloon digital ecosystem, it provides services and support to public and private players engaged in implementing the digital strategy.

A brand. Championed by all those involved in Wallonia's digital transformation, it guarantees their visibility and unites the initiatives implemented within the framework of the digital strategy.e

TWIST (Technologies from Wallonia for Image, Sound and Text) is a business network of companies and a community platform that promotes innovation and growth in digital industries in southern Belgium, and mainly in digital sectors of Image and Sound.

In 12 years, TWIST has built a solid network of some 110 members (representing 4,500 direct jobs and a turnover of 1 billion euros), 80% of which are SMEs, 5 television channels, 6 universities & research centers, and 3 investment funds. TWIST is also supported by its public authorities and is an official partner of Digital Wallonia, the digital strategy adopted by the Government of Wallonia.

In this context, TWIST has developed a strong expertise in the “live sport & entertainment” industry (Sport & e-sport, Entertainment TV, Museum, Attractions/Theme parks, Live show, Live music, cinema).

BACK2BUZZ

Sands/Venetian Expo #51130

Back2Buzz envisions to become a European key player in High Grade refurbished high end smartphones and green accessories. It envisions to be the preferred supplier of corporates wishing to extend their ecological footprint throughout the circular economy. Next to having developed a successful privileged distribution network of sound partnerships in Europe it envisions to enter non-European countries.

Back2Buzz believes that the refurbishment of smartphones can reduce the electronic waste mountain and re-use dozens of minerals needed to fabricate a smartphone. By refurbishing smartphones, Back2Buzz easily extends the life cycle of these devices by another 2 to 3 years before getting recycled. Next to that, Back2Buzz launched an entire range of eco-friendly accessories some of them even entirely bio-degradable.

Back2Buzz developed a buy back program based on an app to calculate the residual value of a smartphone and check the cosmetics by an Autograding solution.

COMPANY BACKGROUND

Founded in 1995, the company specializes in parking lot management. Capflow develops FlexiPark a suite of applications dedicated to parking lot management using licence plate recognition technology but not only.

ADDED VALUE

Capflow proposes a unique management solution tailored to customer needs. Used by a large community and already rich of two Windows and Web-based user interfaces, Flexipark is also available as a smartphone apps allowing users to stay connected to any location with their solutions.

RANGE OF PRODUCTS

FlexiPark is a fully automatic multimodal access control system based on ANPR, proxycards or bar/dot codes. Flexipark provides a complete suite of management tools based on in and out flows.

DELTRIAN INTERNATIONAL

Sands/Venetian Expo #51130

For more than 50 years, Deltrian has been manufacturing air filters that improve the quality of the air we breathe. Thanks to the work and dedication of our teams, we provide the best filters to our customers. Our air filters are capable of filtering the smallest particles of polluted air and provide clean air.

In our industry, we aspire to be a leading player, to lead change, to innovate and of course to grow. But above all, we want to achieve this goal by making responsible choices and taking decisions that take into account not only today's data, but also their potential impact on tomorrow.

IntoPIX SA

Sands/Venetian Expo #51130

intoPIX is an innovative technology provider of low power, low complexity image processing and video compression IP-cores. The technologies that we license are enabling the simplified connectivity, reduced latency, reduced power and an increased quality in many devices and applications.

At CES 2022, we are showing how the new image Sensors and cameras, automotive ADAS systems, mobile devices, 8K displays, 5G/ wireless video devices get benefit from our technologies.

The following technologies will be highlighted at the show:

- JPEG XS technology: the first IP-core & software implementations of the new ISO JPEG XS compression algorithm (for ASIC, FPGA and software). JPEG XS is the standard for microsecond-latency lightweight video compression, known as intoPIX TicoXS®. (www.intopix.com/jpegxs).
- TicoRAW technology: the new low memory and low complexity raw image processing and compression designed to reduce bandwidth and preserve raw image sensor data information.
- Flawless imaging (FIP) and FlinQ technologies: technologies especially designed for 5G and other wireless applications, cloud-based gaming where we cannot compromise on latency and image quality.

intoPIX will demonstrate new efficient ways to transmit, store or manage higher resolutions (HD, 4K, 8K). It reduces device's power consumption, complexity, memory, and video bandwidth. It offers a zero latency preserving lossless quality (from 4:1 down to 20:1 compression) and preserving high dynamic range (HDR) for both visualization and analytics.

intoPIX IP-cores are licensed under several platforms including ASIC, FPGA, GPU or CPU.

Visit the intoPIX booth (booth #51130 - Venetian Expo) to see live demonstrations of the intoPIX technologies. To learn more about intoPIX or arrange a private demonstration.

MINTT

Sands/Venetian Expo #51130

As a specialist in the behavioural analysis of elderly people, we, at MintT, have developed a technological approach to help elderly people to pursue an active and autonomous life. ISA, the assistant in case of falls.

Based on a 3D sensor and AI, ISA revolutionizes fall detection and prevention. ISA is installed in the room and living environment of people with a risk of fall. The person as nothing to wear for 100% comfort and security compared to traditional wearable solutions. Autonomous and non-intrusive, ISA has the embedded intelligence needed to detect all types of falls.

ISA is designed to lighten the work of carers while improving the quality of care services. At MintT, we cater for patients' safety, carers' work quality and family's peace of mind.

E-PEAS

Sands/Eureka Park booth #61255

E-peas develops and markets disruptive ultra-low power semiconductor technology. This enables industrial and IoT wireless product designers to substantially extend battery lifespans and eliminate the heavy call-out costs of replacing batteries, without in any way compromising on reliability.

Relying on 15 years of research and patented intellectual property, the company's products increase the amount of harvested energy and drastically reduce the energy consumption of all power consuming blocks within wireless sensor nodes. Headquartered in Belgium, with additional offices in Switzerland and the USA, E-peas offers a portfolio of energy harvesting power management interface ICs, microcontrollers and sensor solutions.

LEVITA

Sands/Eureka Park booth #61255

LEVITA offers extraordinary visual experiences by highlighting prestigious pieces for commercial and artistic purposes. We use the art of magic to generate emotions and to anchor a product in a strong and lasting way in the customer's minds. LEVITA sublimes any object in a unique way thanks to its cutting-edge technology that allows the object to fly in a window display.

Currently, LEVITA has developed two products in the range Gravity Display : The Box & The Cute.

These two types of window display are plug and play, very easy to set up, customizable, and allow the control of the path and speed of the object(s) in levitation.

Besides the Gravity Display, LEVITA positions itself as a creative agency that offers innovative solutions to showcase any kind of products in unexpected ways and carries out tailor-made projects for an unforgettable result! We bring magical stories to life in the stores or on events.

PRODUCTION

Sands/Eureka Park booth #61255

To provide translations on even the most technical subjects rapidly and for an affordable price, and with the guarantee of impeccable quality - we at Production use a unique, innovative automation system: NMT, or Neural Machine Translation. NMT uses a smart application to create a reliable foundation for professional translations that are also correct in their use of terminology.

Because we want to guarantee a correct translation that is comprehensible to the target audience in all circumstances, the texts are exclusively verified by our experts and corrected or adapted, where necessary.

Thanks to this essential collaboration between person and machine, Production can guarantee flawless translations of large volumes of text, in every specific subject area.

Production improves output from commercial NMT, translation memories, terminology databases, and CAT systems on customer level, by training our own NMT systems (customer, language and/or domain based), in order to increase speed and quality of the translation.

The improved NMT output is post edited by humans and helps to re-train the systems. In time, customer translation will be better and cheaper as the Production NMT system improves automatically the output.

WIDEYE

Las Vegas Convention Center #6577

Corporate scale-up of the Tokyo-based AGC Group (a world-leading supplier of flat, automotive and display glass, chemicals and other high-tech materials and components), Wideye® by AGC is totally focused on autonomous vehicle ecosystem.

Since 2016, Wideye's vision is to enable ADAS deployment and bring fully autonomous drive to reality.

Thanks to comprehensive R&D and partnership with sensor companies, Wideye has established the know-how to manage 360° sensor integration programs from the early development stage up to mass production. Wideye addresses its innovative services & products to sensors suppliers, automotive tier 1's and OEM's by closely working with them.

Wideye uses its large ecosystem, to help its customers design, prototype and industrialize the perfect integration solutions for their optical sensor modules such as LiDAR and CAMERA (vision glass, cover glass).
